

Curriculum Requirements

FM programs are 36 months (three years) long.

Clinical Curriculum

6 months of elective experiences.

Each resident should be assigned to a primary FMP.
(minimum of 40 weeks per year¹)

Experiences should be structured to minimize the frequency of rotational transitions, and rotations must be of a sufficient length to provide longitudinal relationships with faculty members.

Scholarly Activity

Residents should complete two scholarly activities, at least one of which should be a quality improvement project. Residents should work in teams to complete their scholarship, partnering with interdisciplinary colleagues, faculty members, and peers. Residents should disseminate scholarly activity through presentation at or publication in local, regional, or national venues.

¹ Other assignments should not interrupt continuity for more than 8 weeks at any given time or in any one year of the program (Interruptions should be at least 4 weeks in length).

² Clinical experiences should integrate multiple healthcare team members and other clinicians to provide interprofessional team experiences: behavioral health specialists, certified nurse midwives, clinical nurse specialists, laboratory technicians, nurse practitioners, pharmacists, physician assistants, etc.)

Didactics

Regularly scheduled didactics are an integral part of the curriculum, and faculty are expected to support and participate in these activities.

Weekly lecture requirement (i.e., daily noon conference or weekly half-day didactic workshops)

Grand rounds, journal clubs, M&M conferences, etc.

Board and other exam preparation

Block Diagram

The rotations within the program will take place at two sites sites¹ and are curated to provide the best experience for residents.
